A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 5/27/2004 has been entered.

The following is an examiner's statement of reasons for allowance: The references listed in applicant's IDS of 5/27/2004 have been reviewed, but none are seen to disclose or teach the presently claimed invention, which is a power system, or a method of operating a power system, in which a bridging power source is activated in response to the characteristics of a primary power source, a secondary power source including a fuel cell is activated upon depletion of the bridging source, and the secondary source is interrupted in response to either its own depletion or the cessation of the characteristics of the primary source which initially caused activation. Speranza *et al.* (US 2003/0072977), discloses a system in which the bridging source is responsive to the secondary source, the opposite of the secondary source activation presently claimed. Applicants point out in the cited letter from Luarensen, the common points between Jungreis *et al.* (US 6,134,124) and Speranza *et al.* While Jungreis *et al.* disclose energy storage devices, such as fuel cells and batteries, which could be used as the present bridging and secondary sources, this patent does not disclose the presently recited control relationships between these sources. The most relevant foreign reference in the IDS would be Liu *et al.* (WO

01/71885), which discloses which includes a fuel cell and a battery, and that a fuel cell may be activated and de-activated in relation to the voltage of the battery.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
